To Whom It May Concern:

The cancellation of the Home Solar rebate has angered and aggrieved my family and I to the extent that I wonder why this Federal Labor Government really has any green credentials at all! Pater Garrett has shown he has compromised his anti atomic stance and penny Wong has caved into Brumby on stealing water from the Goulburn River to the detriment of the Murray Darling system! The Solar Panel rebate has been cancelled because it was SUCCESSFUL? As a long time voter We are disgusted with this Rudd Government and will not vote labor again!

As a volunteer CFA fire fighter in the recent Feb 7<sup>th</sup> Victorian fires, we lost Mains power for over 10 days so we suffered massive food spoilage and other losses. We live in a Sunny disposition and solar power will make a massive contribution to our pensioner lifestyle and limited income.

I believe we have the right to receive the \$8000 rebate to the cost of solar power that is now lost to us. This labor government has let us down badly! Time to change our voting alliance?

Paul and Margaret O'Brien
