Subject: VSU

Dear Mr Senator,

I believe VSU will have a negative impact on University Life. The funds generated by the fees the student body pay help many disadvantaged students of the university. When VSU is introduced, many students won't be able to afford the higher club fees thus, the quality of university life one can maintain is dependent on the amount of money one has. The introduction of VSU decreases equality among students that is maintained under the current fee system. Under the current system all students have exactly the same opportunities to join all clubs and participate in University activities. VSU should not be introduced in Australian universities.

Yours sincerely,

Chloe Pearse
