To whom it may concern,

This would have to be the most dumbest idea i have ever heard of. Building a nuclear waste dumb near katherine. Where do u live? I'll come and put a nuclear waste dumb near your house. No i didn't think so. You might as well put it in the middle of katherine, because it'll still affect us or somehow get into our water supply and it will end up killing some of our flora and fauna. It shouldn't matter if we are a state or territory, we should be able to make our own decisions on what we want in the NT. I am 15 and right now we are the future of Australia. If we get exposed to radiation or some dangerous chemical and we have children when we're a bit older then the chemical that we are exposed to could deform our children in some way. As i some up this letter i want you to think about if there were a nuclear dumb near your house then you would be a bit worried for your safety and your future childrens safety. I hope you can see this from my point of view and not build this waste dumb.

From Daniel Murden

To whom it may concern,

dont dumb your nuclear waste near us. We already have enough smelly things that give u diseases in katherine. why cant u dumb it out bush. How would u feel if i did a dump on your front lawn, not good i bet. So stay away from ours.
