**Subject:** radioactive waste management bill

The Chair - Senator Judith Troeth  
Senate Employment, Workplace Relations and Education Committee  
Inquiry into Commonwealth Radioactive Waste Management Bill 2005

I am concerned that :

this bill has been introduced too hastily ,

there has not been consultation with the NT government or others who would be affected,

this legislation goes against the federal government's earlier promise not to impose a nuclear dump in the NT,

there would be the possibility that radioactive materials from other countries be dumped here.
