**Subject:** commonwealth radio active waste management bill

I am writing re; the Commonwealth Radio Active Waste Management Bill 2005.

I am vehemently opposed to the legislation imposed by the Howard Government and the ways in which it overrides all state based ability to make decisions, the ability of indigenous land owners to partake in decision making processes, the ability for citizens to partake in what was once a democratic process.

a waste dump anywhere in Australia is an issue that needs details analysis and much public consultation and interaction. With the intent to actually take our views and values into account - something that has fallen by the wayside.

Any new developments in the Australian nuclear field must be well thought out, not barnstormed through parliament in acts of heavy handed, short sighted, power hungry governance.

This bill must be opposed, Scullion for the good of all Australian people, not just his constituents must cross the floor and oppose this short sighted greedy bill.

Yours truly  
Louise Morris
