Subject: nuclear dump in Katherine?

16/11/'05

*The Chair - Senator Judith Troeth
Senate Employment, Workplace Relations and Education Committee
Inquiry into Commonwealth Radioactive Waste Management Bill 2005*

I write this letter to you The Chair, Senator Judith Troeth in light of the proposal to establish a nuclear waste dump near Katherine. Herein i find it necessary to register my strongest objection.

Nuclear power should not be supported in any way, the sun being peoples' safest and most reliable power source. To deal with the nuclear waste currently in circulation the site should be chosen based on thorough research into transportation and storage of this waste and its potential effects on the people living in that area. The Katherine area seems to be 'a point of least resistance' and politically a 'nuclear waste target.'

I would ask of you The Chair, Judith Troeth that you take my objections to the Katherine Region being used to store nuclear waste into consideration in your dealings with this matter.

Thankyou

Cynan Dowling
