Subject: no to nuclear waste

To whom it may concern

I think that putting a nuclear waste dump in our outback is negligent because it would ruin our natural flora (plants) and fauna (animals). if the nuclear waste dump goes to plan it would also ruin the tourism for the Northern Territory because the waste would escape into the soils and water making the animals and plants die because of no sufficient water source.

P.S. I have lived in Katherine all of my life (15 years) and my research has shown that the weather is unsuitable for a nuclear waste and that there is an insufficient power source
