**Subject:** nuclear waste storage

The Chair  
Sen Judith Troeth  
Senate Employment, Workplace Relations and Education Committee.  
Inquiry into:  
Commonwealth Radioactive Waste Management Bill 2005

I am writing in relation to storage of Radioactive waste in the Northern Territory or any other part of Australia.

1. The storage of this waste will make us a perfect target for terrorists.
2. Why should we take back waste? Other industries aren't obliged to take back their polluting muck! Some countries are taking responsibility for having book such dangerous substances and are spending big money on storage, visa vis Denmark.
3. The transportation of this waste is very dangerous. Another possible terrorist's delight or the possibility of accident and contamination. The waste dump may be in a remote place but getting the stuff there is a problem.

Uranium is one big problem, leave it in the ground.
