SUBMISSION TO THE STANDING COMMITTEE ON FOREIGN AFFAIRS, DEFENCE & TRADE. 14th Oct.2006

It is the opinion of the **AUSTRALIAN NUCLEAR VETERANS ASSOC.** that the provisions of the Australian Participants in British Nuclear Weapons Tests (treatment) Bill 2006 Does not go far enough in extending adequate compensation coverage and support to Australian Tests Participants (Nuclear Veterans) of the British Nuclear weapons Tests in Australia.

It is our sincere opinion that full coverage under the Veterans Entitlement Act should be extended to all of those military personnel who are bona fide British Nuclear Weapons Tests participants and whose names appear in the Government's nominal roll, and to those civilians who were fully employed by the Federal Government and were present during the actual tests or may have been involved in the cleanup period after the actual tests,

The General difference between Military and Civilian participants is that civilian participants where only involved if they wanted to be and earned extremely high wages and bonuses, they could leave at any time that conditions were not to their liking.

Military personnel on the other hand were there because they were ordered to be there and had no say in the matter; they were all forced to sign the secrecy act. And came under military law as well as civilian law, civilians although some few were directly employed by the Federal Government most were employed by large companies similar to Hardies Asbestos Co. Roach Pty Ltd, Bell Brothers Pty Ltd. Kwinana Construction, Etc. these companies like Hardies would be responsible for compensation to their employees.

Most of the civilians whose names appear on the nominal roll had left the test site before any tests were carried out and were put on the nominal roll purely to water down any tests or studies that would follow.

It is our opinion that military nuclear tests participants (Nuclear Veterans) should be allowed full qualifying service under the Veterans entitlement Act. or at the very least, immediate full implementation of the Clarke Committee's Recommendations.

D R Johnstone
(NATIONAL PRESIDENT ANVA)
