

I am wanting to be reassured that heavier penalties for those that might debate the wisdom of the USA's spying facilities is not so. Why should the USA be exempt from criticism by Australians. I think we should be particularly uneasy about this in light of what we know has gone on with perhaps Australia's complicity in the rendition policy, Guantanamo etc. Also there has been such secrecy around the facility that little is known. This facility is on Australian soil yet it seems to be exempt from any reasonable accountability.

With thanks
