

ACCESS CARD BILL

OBJECTIVE

The nation needs an ID card. To identify the individual - ONLY.
To avoid complications and objections, we don't need a "do all" card.

AIM

To prevent fraud and misrepresentation in all activity including welfare and illegal presence.

CONCERNS

Civil Libertarians are concerned about privacy, illegal cross reference etc. The ones concerned are those who have something to hide!

RISKS

Emotion, propaganda and fear. Forgery.

SIMPLICITY IS THE ANSWER

All we need is minimum information to establish identity (ie) -

1. Serial Number (in sequence) cancelled only by death certificate or emigration certificate.

Once cancelled, cannot be reissued but recorded as a dead number referenced to the originator.

Serial numbers must be accountable in series to avoid forgery.

2. Birth (or Immigration) certificate number and date.
3. Photograph – physical description - retina ID detail etc.
4. Maybe Tax File and Passport numbers.

No other information (ie) all health, status, convictions etc can be held on other separate systems as applicable as at present.

Heavy penalties for referring any other information to the number.
