*Senator Faulkner, I'm writing to express my hope that you'll reconsider the scope of your proposal to register lobbyists.*

*surely, probity requires a full public register of any and all individuals, companies and who they represent.*

*should also include any exchange, gift or donation, ..... in short any advantage given to those being lobbied.*

*stant refrain heard is my time in the Public Service was 'the Act is not only followed but must be seen to be followed'.*

*all the people's representatives are duty bound to declare their interests be they conflicting or otherwise, and how can this not be extended to those wishing to deal with them in a manner superior to the people?*

*Unfortunately, history has shown us that people, at whatever level they serve, are tempted and fail in their duty.*

*f we are to allow lobbyists (which I personally feel is unethical), then a comprehensive listing is a must.*

*Carl Mather.*
