

I wish to express my reservations with dealings undertaken with the USA
on
the FTA. I believe that the Australian officials in connexion with
these
dealings are misrepresenting Australian future economical and commerce
strength, in short we're being sold out. It is apparent from recent
media
coverage (not that the media are so trustworthy) that the USA
interpretation
of the agreement is substantially altered to Australias. This can only
lead
to an eventuality of issues being resolved in world court proceedings,
or
Australia being rail roaded, simply because the USA do not play by any
rules. I believe the USA to be a greedy, selfish entity that will stop
at no
end to take decisive measures to obtain control of major economic
vehicles
that sustain a countries economy and commerce, also in short, they are
out
for world economic control. I stand by the Australian advocates that
refute
a FTA with the USA. It is not in Australias interests to have these
dealings
with the USA, we are so much better off standing on our own two feet
and
being masters of our own desteny. DONOT sign any FTA. Your
Mark
