

## SUB 338

re: Free Trade act with the United States.

I am deeply suspicious of the USA's intentions in signing this agreement. I don't think that it will be beneficial for Australians in any way. It will just make it easier for US global dominance through the introduction of homogenised international chains such as Walmart coming here and wiping out small Australian business. The fact that we did not get any relief for the cane farmers in the deal is further proof that this is not a positive thing for Australians. Please re-consider and strike this agreement from being passed!!!

Thank you very much, Corr Piccone
