

Attn; Senate Select Comm. Reviewing U.S.-Aust. Free Trade Agreement
Dear Sirs:

The proposed Free Trade Agreement between U.S. and Australia should not be ratified for the following reasons:

1. The United States does not enter into trade agreements to benefit other countries.

2. The agreement should not exclude a major commodity such as sugar.

3. The question of pricing of pharmaceuticals has still not been clarified.

4. The abolition of the FIRB requirements will offend our other trading partners

5. The Australian National Identity will be further eroded by easing of media ownership regulations and pre-packaged TV programming.
