

Australia is an independent country with a high standard of living and appropriate public services. These include health, education, transport, media and the arts. Australia has a strong Primary Industry sector as well as large areas of natural vegetation including Wilderness. These are of great value to me and other Australians as well as members of the international community.

I believe that anything which jepodises these areas of service, industry and natural resources is not of benefit to our community. I believe that the USFTA does jepodise these Australian community resources. For this reason I ask the current and future Australian Government Representatives not to sign this agreement.

Yours faithfully

Catherine Errey
