

To whom it may concern,

I strongly object the Australia and USA FTA. I do not believe that it is in Australian's interest to allow such an agreement to take place. Although it is suggested that Australia will take in huge financial gains, I dont believe this will compensate the degradation the FTA will cause our health systems, media, environment, livelihoods and precious democracy.

It removes free choice and the right to be flexible by challenging current regulation.

The FTA does not have room for compassion or fairness as trade will always win over commonsense and logic. It does not consider what is best for the individual, right up to what is best for every organism on a global scale. It can not see past it's own needs and agendas. Therefore, how can this be of benefit to all Australians.

"Please dont sell Australia's soul to the Devil".

Best Regards

Pauline Stirzaker
