

Senate Select c'tee
US Free Trade Agreement
Parliament House
Canberra

Dear Sir

(1)
a pensioner, 68
Years old, I am a chronic schizophrenic.
I require daily/nightly 1 ORAP (not on the
PBS), 2 Diazepam (valium) (on the PBS)
and 1 Nitrazepam (mogudon) (on the PBS).
I am certain that these medications
will rise in price in time with the
passing of the US Free Trade Agreement

(2)
Valium I know the
price in USA compared to the
Australian PBS cost. The
cost of monthly medication I
purchase is over \$500 per month.
USFTA has its way in all its
dispositions, the "Australian public
health goal of affordable access to
medicines for all" will be jeopardised.

Yours

Stephen Roberts
