

Dear Sir

You stated that people are paying 27% of their income on house payments or rent was this an average of the whole of Australi or maybe based on people's gross income?

I receive \$700-00 per week in my hand approx 30% of that would be \$210-00 per week and that is not enough income to pay a mortgage on a house so I rent as many others in my position do

I'm unsure where you get these %'s as most people I know are paying more than 30% on rent or mortgages

Cheers

Joy Wii
