

My name is Michael Mok. I am related to someone with close tie to Australia. I understand the Bill 2005 will enable Person born oversea who somehow failed to be registrated as Australian by their parents to become citizenship by descent when the new bill is passed.

But it is not clear what statue her/his child who were also born oversea and national of other country would be.

The requirement of two years residency of the person who became Australian by descent before her children could be registered made me wonder what if the children are minor and dependent on their parents/parent.

I do apology if consideration had been made on case as above that i didn't read yet on the net.

Hopefully the new bill would make the above would clear my thought on the above.

Sarawak Malaysia.

Thanks

Best Regards

Mok
