

I feel extremely disappointed how Government's {Federal and State} have FAILED to address modern day issues that have escalated resentment, especially when father's are being forced out of family life, by unscrupulous policies. If this Inquiry demonstrates any concern, changes ARE urgently required.

FACTS

I feed, play and look after my children every day after school till after 6pm, plus Saturday, provide play equipment at the home they grew up, until the Ex {who found another mate, then started her first, full time job} picks them up after work.

I have worked permanently since 15yo and weekends to earn an 'average wage', now 50yo, this defacto and my female lawyer agreed to her demands of;

a.. Her ,maintaining custody of our children, only 1 night p.w. at my place, using CSA for a full benefit.

b.. Half my large retirement Superannuation in CASH {no tax, or waiting till 65};

c.. More than half of Assets {the 10yo family house valued at 2004 prices}, all regardless of MY continuing mortgage repayments and contributions, as many lawyers say " This is a better outcome than going to court" .

d.. Many good men I know, some who have suicided, hate this system of equitable injustice.

e.. I and many other informed men, never wish to be HAD by this system again, by starting a "long term", 2 year, relationships, for a future partner's benefit.

WHY

1: Was the "no-fault" divorce policy introduced, to make Judges judgements far easier and lawyers wealthier, irrespective of circumstances and ethics ?

2: Was "domestic violence orders" a easy way for police to remove hubby / partner, irrespective of false allegations ?

3: Has "the best interest of the children" been just a verbal tool for judges, to mainly give mothers custody, citing past precedents ?

4: No immediate parental accountability by Hospitals / Doctors when a child is born, rather, a legislation preventing DNA testing to provide PROOF, why allow deceit and false pretences to prevail ?

5: Have deaths from forced separations {suicide and murder suicide} increased dramatically ?

6: Do legislations erode the basic Christian fundamentals of the 10 Commandments;

by stealing { the children, one's soul and life savings}

by condoning adultery, with no repercussion, only reward

by killing a unborn child with a "passed bill" for a abortion pill

by putting money and profit before God .Sunday trading and society loosing ethics and concern for others.

7: Do people still swear on the Bible in Court, is this hypocrisy ?

8: If "Every picture tells a story", has the Government's album got only 1 picture of a mother and child holding a C\$A letter, in it ?

9: When one parent feeds, plays and organises so much with actual contact time, greater than the other parent who "sees" the children 1/2 hour before work and 2hr after work, before bed time, why is a bed-sitter so richly rewarded ?

10: The CSA does not recognise CONTACT time, only bed time, ?

I feel frustrated that when a caring father, with only good intent, faces a beaucratic "brick wall" of rhetoric, with never a answer from politicians over their hypocrisy and bias, regarding care, custody and payment policies.

WHEN

A partner can find it lucrative to leave a relationship, especially taking custody of the children, that no qualified mediator in any upcoming relationship centre, can stop this "woman's right" to kick hubby / partner out and demand money, all after mediation, with the Government's blessing.

Will any Government accept, more children are growing up with unsocial behaviour, not just buck passing;

Blaming parents is wearing pretty thin, when, single mums and isolated / separated dad's are a direct result of Government's 'giving in' to feminists ideology, that have now, far out-stripped any equality, morality and finances of Fathers.

"The best interest of the child" is forgotten and irrelevant, when as teenagers they can face execution, Bali style, thanks to the Federal Police.

Will the growing dependant use of anti-depressants, tell all politicians there is no joy in over legislation today's busy life.

Will a Inquirer ask for a detailed Police and Coroners report, on causes of why so many parents have been sent " over the edge".

Will common sense prevail, the political immediate action / legislation of "a possible terrorist threat", overriding the reality that some parents will kill, rather than accept unscrupulous policies and injustices in the "System".

HOW

Does society interact, with so much against a Father's role ?

Many decisions, not rhetoric from politicians, are needed to address injustices, especially in the ' bosses' Court ?

Servile to the System must a man be, will women ever fight on the front line because they now, "wear the pants" at home ?

IF Inquirers can address ANY of these questions, I welcome a response.
