

Dear Senate Inquiry - Shared Parental Responsibility Bill 2005

This is a my submission to the Senate Inquiry into the provisions of the Family Law Amendment (Shared Parental Responsibility) Bill 2005

Dear Sir/Madam,

This inquiry is the most extensive inquiry to be held since the inception of the Family Law Act in 1975.

I would humbly ask the members to think that fatherless children are a growing reality and as a result of the lack of male role model in the lives of these evergrowing single parents childrens, the enormous psychological damage done to these innocent victims of the evergrowing divorce numbers, we should stop and reflectand ask ourselves what kind of society is Australia going to have.

Some interest groups are constantly using the domestic violence issue to alianate children from their fathers.

The domestic violence is an "industry" and is geared to vilify only men!

It is has been demonstrated by countless research that domestic violence is not a gender issue, but, perpetrated on an equal basis by females toward their spouses. The most recent of these research was concluded by Professor David M Fergusson Executive Director Christchurch Health & Development Study Department of Psychological Medicine Christchurch School of Medicine & Health Sciences which concluded that both males and females were equally perpetrating domestic violence in the home. A copy of this report is herewith attached for your consideration.

In conclusion of my submission, I would ask you to consider whatever decision you are going to make to be based on an impartial and fair basis. As the ramification of whatever happens will be felt by the parents and their childrens for generations to come.

Thank you and God speed.

Thank you for reading my submission
