

I thank you for the opportunity to lodge a submission to the Senate

The House of Representatives Family Committee is currently seeking to address issues contributing to homelessness. The Government's White Paper The Road Home has identified family breakdown as a key factor in homelessness.

I urge the Senate to oppose redefining marriage. I urge the Senate to instead do all in its power to uphold marriage between a man and a woman. Children should be given every possible opportunity to have a mother and a father.

Thanking you
