

WHY MARRIAGE BETWEEN ONE MAN & ONE WOMAN TO THE
EXCLUSION OF ALL OTHERS MATTERS.

Family, based on the marriage of one woman to one man to the exclusion of all others for life, is a key fundamental foundation on which a healthy society (physical/medical health, social/emotional health, mental health) is built & maintained. Social science research around the world has confirmed this again & again.

Homosexuality is NOT a human rights issue. Should this change to the marriage act become endorsed as policy, how long will it be before other groups come forward seeking more changes to the act, claiming discrimination? Eg. Polygamists would ask that they be included by amending – “between two people” as has already been sort in America.

Than paedophiles would want to change any restrictions on age & those who practise bestiality ... - where might it end unless a correct stand is taken now?
