

Dear Sir/Madam

I would like to formally submit my views on the proposal to change reference to married couples in legislation:

1.. I oppose the devaluing of marriage by treating it as just another "couple relationship" along with same sex (homosexual) relationships;

2.. As I believe that only marriage benefits society, only marriage should receive benefits in law.

3.. All children deserve to be brought up with a mother and father so the law should NOT be changed to suit the desires of some adults in same sex (homosexual) relationships to have a child as "a product" of their relationship.

Sincerely,

John Sharp
