[institutions]...

*witness all enforcement agencies

*

by bullying more akin to adult thuggery
by practitioners (some subliminal) * ^{upholding letter of law} ^{not the spirit of the Law}

people treated with zero allowance for dignity

herded at times

allowed no point of view

pills (no real efficacy)

-are only varied forms of anaesthetics

-are changed by practitioners when even

the present regime is less malign.

So called care-workers continue the thuggery with
trick questions in your home where the correct
answer is to sell your soul to the Devil [I
suggest: their boss]

The rather idiosyncratic answer so called
"mental patients" give are the truthful response
of a decent person

eg. Cornelia Rau in reference to giving
her Christened name.

Wrong answer was the right answer
by a good person to bad people

they insinuate, intimidate and attempt to negate positivity and constructive assertions of self worth intimidated by the interviewed.

People can not sit down and rest (anywhere) as they should be allowed in a free country, [if Australia was a FREE COUNTRY] as in a specific instance a woman resting on the footpath was picked up by police and spent weeks in an ~~instititit~~ institution

Stooges accept the system, are treated well, but do nothing, but add to banality of the current society.

Opium is the only medicine which
should be offered severely distressed
persons [not a derivative]

I have tried this and it is GOD designed
for such a purpose [Scandinavia]

If a person can not be entertained in a
coming to the fold [God's wisdom] they
should be offered opium. It is now
time to throw off immature value judgements
and misconceptions. [I think another one was
known as mandy's]

LOOK: it's NATURAL and it could not
have been ~~better~~ designed and placed in time.

Give up playing with your chemistry sets
Alleluia or EUREKA -

IT'S HERE

Now already - vanity should be stepped
away from by SCIENTISTS

Mental Health [to be known by good people
as mind wellbeing]

has been

Punitive.

not as should be, °therapeutic.

Stop playing with anaesthetics and
use opium [do not refine!]

If someone comes in [hosp.] aberrated by drugs, alcohol or both you quarantine them [not a cell] and make them comfortable till they sleep it off. Next day in no uncertain terms read the riot act, in reality, not some soft condescension - they could kill someone while affected.

They may need transference to a rehab facility if recalcitrant.

People, generally, who aren't well, should not be kept waiting, should be given food, drink and warm conversation - but no tranquilizer.

Mostly if made welcome, warm and secure THEY WILL BE ALRIGHT IN THE MORNING - they should be asked what they need to be of help, usually it's (a lot of cases with the elderly) it's FRIENDSHIP which is about the only positive thing about institutions NICE PEOPLE around the place.

DOCTORS AND NURSES are not friendly, minimalising in the interaction, in reference to respecting human dignity etc.

They are coming from a power intoxicated position (also nurses) and to downgrade their role would be a great positive.

[Short term debilitation] is most
unjustly, unfairly and CRIMINALLY
being referred to as a long
term disease.

C.M.A.
20.7.2005

This is the truth as I see it.
C.M.A.
