Subject: call for more mental health services

I am a mental health worker.

I write to you to call for more services for mental health in the area of admission beds and staff, more capacity to manage those in the community and more accomodation to provide structure and support to those with a mental illness. There seems to be a high rate of homelessness or inadequate stressful housing for those with a mental illness and lack of support sturctures that contribute to costly relapses.

Sincerely
Anne Hayres
