To whom it may concern,

**Re; Airports Amendment Bill 2006**

I write to you to submit my concerns with the Adelaide Airport and the impact it has on me and my family.

The Adelaide Airport Insulation Program initiated in 2000 did not allow for many homes and dwellings under the flight path to be insulated. Other buildings such as schools and churches further away from the Adelaide Airport were insulated, however many homes between these buildings and the Airport were not.

We have pleaded with the Federal Government to expand on the Airport Insulation Program to include more homes. Prior to the new Adelaide Airport, noise from planes landing were a daily problem. Since the new Adelaide Airport has opened I have noticed an increase in planes therefore the disruption from noise has not only increased but become more frustrating. This increase in noise has had a negative impact on the value on my home. I invite members of the Senate Committee to visit the area and witness the noise from the Airport.

Yours sincerely,

Gianni Daniel
