To whom it may concern,

Our local community in the foothills and slopes of the Darling Ranges east of Perth is still reeling from the Liberal Government's decision to allow a smelly brickworks to be built on the Perth Airport lease.

This Bill's intention to permit non-aeronautical development at leased airports is a bad one. The Perth example shows why, because the planning and environmental powers that would normally be locally invested have been over-ridden by remote, business-led Commonwealth Government concerns.

Thank you.

Kindest regards ...

John Cumbers
Secretary
