re National Animal Welfare Bill

Dear Ms Weeks,

I write to support the move to reduce / replace animal experiments with alternatives using either less animals, or better still, no animals. I feel that when we abuse our position of power over any animal, as in the process of experimentation whereby living beings are regarded as non sapient / non sentient, we actually abuse ourselves at our soul level. We are custodians / caretakers of this planet and all life systems. An inquiry by the Senate into the "complacency" of animal users is well needed. I pray that the use of live animals will be phased out as soon as possible.

Yours sincerely,

Alice Shore

BA, Dip T
