

Submission from HKM HALAL KIND MEATS

TURN AUSTRALIA AROUND

I am presently working in direct contact with foreign consulates and councils to establish a chain of Halal Abattoirs Australia wide. We will be consulting at grass roots levels with our Australian farmers. For far too long our Australian farmers have been largely ignored when they should be our first priority. Please read the enclosed information and I would seek a meeting with you in relation to this exciting project. Every time we send an animal LIVE from our shores we are sending all our by products from which small goods are produced. Australia should be the largest exporter of smallgoods in the world. Muslims do not eat by-products and simply dispose of that part of the animal. They now realise that they are literally throwing away billions of dollars and intend to make huge changes. Myself and the head of the RSPCAQLD have had meetings with high profile Muslim leaders who assured us both that other than for festivals they do not require their meat live and have stated it is purely a matter of economics. Live Corp are not the exporters, they are purely the middle man. It is interesting to note that while our Aussie farmer battles and it is said there is no money in farming that companies such as Elders, Westfarmers and others are riding high on the backs of our farmers and Australian peoples' loss.

EMPLOYMENT

There are a large number of indigenous and Aboriginal people unemployed Australia wide, particularly in far north Queensland and the Northern Territory, in fact this is true Australia wide. I have no doubt live export from Australia WILL BE BANNED SOONER OR LATER. I propose to present this in a national Australia wide documentary with a television network in the near future. At that stage we will be inviting people such as yourself to come on that program and debate this issue before the Australian public. Further to that I would simply like to add I respectfully request that you come on board with this fabulous idea.

Regards
