Senate Rural & Reg. Affairs
Parliament House.

Re inquiry Transles

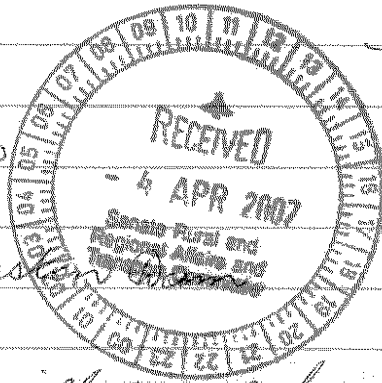

Dear Sir,

This dam will cause havoc to the Great
Sandy Strait marine life, migratory birds, also
to the fishing industry.

Mary + Burnett Rivers are the last habitats
of the Dala (lungfish), Burnett River has already
been dammed, which was not successful, having
inspected the dam and could see the damage
that had been done to the Burnett River.

We have lived on tanks water for
27 years, so think tanks should be installed in
Brisbane homes, and leave our MARY to run
free.

yours faithfully
A. Wedlock
