

Senate Committee
Rural & Regional Affairs
(Traralgon Dam Enquiry)

Dear Sir / Madam,

I would like to add my name to those pointing out that the proposed Traralgon Dam is wholly unacceptable environmentally.

- (1) Displacement of many local residents
- (2) " " " valuable local livestock
- (3) Destruction of habitat May River endangered species
- (4) Adverse flow effects downstream Gympie - Maryborough and estuarine areas.
- (5) Significant problems with existing roads in the area impairing access to nearby towns and villages.

Also of course the cost projections are enormous and the likelihood of useful water storage (if it ever fills) is remote.

Yours faithfully

~~David~~
