Dear Secretary,

Enclosed a photo of the beautiful Mary river. Maryborough was built on it. The park runs alongside it with magnificent trees. If the water is cut off these trees may die off. Noone knows what terrible things will happen, you only have to look at history to see the disasters. Look at what dams did to other river systems. Why destroy this one, when there are other places to build a dam. ??

We may need a dam but not the Traveston Dam. It is prime farming land where people work hard and make a living off it. You must not drown them and their childrens' heritage. Please build the Dam somewhere else, don't destroy our Maryborough by stopping the flow of the Mary River. Thank you

sincerely
J. Williams
