

25/3/07

Dear Secretary,
Stop the Traveston Dam, it is against our democratic law of citizens' rights. No one has the right to take peoples' land. Noone can respect such a cruel government who does this to it's people, it's children. There are other sites. Move it elsewhere. There are studies that say it won't even hold the water, because it is good agricultural soil and it will soak the water up, but not hold it. You need more clay and rock to make a good dam, surely they know that. The dairy worked hard to build a good herd for milking, how can you drown all that?? What sort of government people are you?? It's like the Nazis!! What will this do to the children to have their homes taken from them like this.?? Too many people will suffer, why?? because the government didn't act sooner to educate people how to save water, Using tanks and recycling grey water. We could have been doing this years ago. Why can't they give free tanks to all.??? They waste millions elsewhere!! Stop the DAM
sincerely
