Dear Madam, Stop the Traveston Dam.

I really love the Mary River. Everyone goes to the park alongside it for picnics. Tourists come here. The town will lose it's beauty if the river is running low or drying up, and that's what will happen. Learn from other towns' mistakes. Maryborough was built on the Mary River. You can't dam it up. The Lung fish, cod and turtle will become extinct, as has happened in other places, because of the governments' lack of common sense. If everyone had a tank and recycled their grey water years ago, the south would not be short on water. Anyway, it is only to please the cotton growers not the people who need the water. Beattie is a heartless man, I hope his family lose their home one day, then he will know how it feels. I feel so sorry for those people. Enclosed a photo showing how beautiful the Mary river is, why destroy this. ?There are other sites to build a dam.

Sincerely,

D. Pye
