Maryborough  
Q.L.D.

Dear Sir/Madam,

Please do not let the Traveston dam ever be constructed. We are retired now my husband & I of course our four children have known the Mary river for forty years. Once had a farm along its banks, then when we moved further on to a small town to live still in walking distance from the Mary, we have been back to camp in places suitable along its banks we are going again soon for Easter holidays. We have already seen lots of changes due to the weather patterns going all out of w.c. This dam if its built will ruin the whole structure of life from creatures to people.

That land which will be covered in water is very fertile, there is such a need for more food to be produced as the population is racing ahead & won't change & no one can move to uninhabited places where nothing will grow.

Prenier Beattie wants to go & live for only a month where some humans have been battling for years to make a living, he was voted to his position to help everyone in Queensland not just the city, he has become a domineering, power staunch person. He wants to do some serious thinking instead of just grinning like the cheese cut.

Maybe no one will read this, I am writing hoping it will add to a huge amount of mail received.

P.S.

DON'T DAM OUR MARY RIVER  
PLEASE

There has already too many mistakes made by dam  
There are other ways.

Yours Sincerely

E & R. Roswell
