

Submission from Peter Brohier
for the Senate AFL Enquiry

1st December 2008

In a hope that a bi-partisan outcome can be reached regarding access to AFL matches held in various states by all Australians, the following material seems highly relevant.

We look forward to both major parties fairly allowing many thousands of AFL supporters access to matches through an integrated, fair and truly national interstate surface transport system.

“This issue is more than tourism. It is a basic transport and access issue about the entire Tasmanian (also the Victorian and National) community and its relationship and access to other states”¹.
