

Federal Senate Inquiry into Public Transport

Submission : GoGet Carshare

Goget Carshare is a green carsharing organisation that offers people living in the inner city an alternative to private car ownership. We were the first carshare organisation in Australia, and are the largest by a clear margin.

This innovative service reduces the number of cars sitting unused on inner city streets, relieving parking problems and freeing up the streetscape for more productive use. Members of carsharing organisations also choose to use other methods of transport such as public transport, cycling and walking more often compared to car owners, reducing their impact on the environment.

Carsharing urges people to use cars only when necessary, and GoGet's fee structure, which includes a charge for kilometres, makes people aware of their petrol consumption. Goget has a fleet of more than 140 vehicles throughout Sydney, Melbourne, Adelaide and Brisbane, and over 90% of these vehicles are small economy cars (Toyota Yaris).
