

NEW WHEAT MARKETING SYSTEM PROPOSAL

To: Secretariat.

Wheat Export Marketing Consultation Committee.

P.O. Box 858

Canberra. ACT-2601.

RECEIVED

23 APR 2008

BY: _____

New Wheat Marketing System

Has to ~~be~~ meet a defined code of objectives
- these may include:

- ① Credability above reproach - in the dishonesty of executives as former A.W.B.
 - ② Supply - system has to guarantee orderly and long term supply of both domestic and export wheats to i.e. local flour millers; feedlots; drought fodder reserves, as well as ~~any~~ major export end users.
 - ③ guarantee grade segregations - standards of highest quality control to be met, to encourage and placate end users, use of Port facilities etc.
 - ④ Quality Recusal Standards - can be taken from existing industry accepted standards i.e. from Code of Practice if it exists from A.W.B. again etc. to instill confidence in buyers, to be able to deliver a quality product.
 - ⑤ Wheat Breeding: System has to help and facilitate breeding acceptable wheat varieties by an independent body i.e. as per current Dept of Agriculture trials - by a levy from all wheat traders.
- Proposal - submitted by a small but concerned wheat grower.
I believe proposal is a compromise ~~for~~ for both single deal & full deregulation - in the future if system see fit it could go either way: this is a halfway point ~~for~~ for the wheat industry to unite for the benefit of all wheat growers.
